Objective

Full stack web developer with a passion for creating intuitive, inspiring and beautiful web applications.

Education

AWESOME INC. WEB DEVELOPER BOOTCAMP | 2018

- Over 500 hours of hands-on training
- Experience building 10+ projects
- Training in front-end and back-end programming

Skills

HTML | CSS | SASS | BOOTSTRAP | JAVASCRIPT | VUE.JS

- In partnership with a designer, I have developed over 15 websites from static mockups
- Built Conway's game of life – a cellular automaton

LARAVEL | POSTGRESQL

- Created an eCommerce tea shop with a quick search feature, a shopping cart, ratings and reviews and the ability to view past orders

GIT | GITHUB | NPM | PARCEL

- Used daily in project workflow

WORDPRESS | MYSQL | APACHE | UBUNTU | PHP

- Developed and hosted 12 custom themes, many of which were for leading Thoroughbred companies
- Built a feature rich client portal with user specific content, data pulled daily from an API and stored in MYSQL, automatic formatted emails sent when posts are created, CSV table exports and more

SHOPIFY | JAVASCRIPT | LIQUID

- Wrote a solution that fulfilled a client specific need to add multiple items to the cart at the same time

Experience

WEB DEVELOPER | STUDIO 34 PRODUCTIONS | 2019-PRESENT

- As the only full stack web developer, I created the company development workflow, led backend projects, moved all sites to VPS and implemented Google Analytics and Cloudflare
- Built 2 company specific WordPress plugins to automate processes and save valuable time
- Estimated and quoted clients for development time on backend projects
- Regularly communicated with clients to see projects to completion
