Objective

Full stack web developer with a passion for creating intuitive, inspiring and beautiful web applications.

Education

AWESOME INC. WEB DEVELOPER BOOTCAMP | 2018

- Over 500 hours of hands-on training
- Experience building 10+ projects
- Training in front-end and back-end programming

Skills

VUE.JS

- Built Conway's game of life – a cellular automaton
- Built a timer app that allows custom time intervals and visually tracks remaining time
- Built a sortable, searchable GUI that queries a WordPress REST API

HTML | CSS | SASS | BOOTSTRAP

- In partnership with designers, I have developed over 18 websites from static mockups

PHP | MYSQL | APACHE | UBUNTU | WORDPRESS

- Developed and hosted 13 custom WordPress themes, many of which required custom PHP plugins
- Built a feature rich client portal with user specific content, data pulled daily from an API and stored in MYSQL, automatic formatted emails sent when posts are created, CSV table exports and more

GIT | GITHUB | NPM | PARCEL

- Used daily in project workflow

LARAVEL | POSTGRESQL

- Created an eCommerce tea shop with a quick search feature, a shopping cart, ratings and reviews

Experience

WEB DEVELOPER | STUDIO 34 PRODUCTIONS | 2019-PRESENT

- As the only full stack web developer, I created the company development workflow, led projects, moved all sites to VPS and solved all programming related problems that arose.
- Built 2 company specific WordPress plugins to automate our processes and save valuable time
- Estimated and quoted clients for development time on projects
- Regularly communicated with non-technical clients to see projects to completion
